

CHLORAMINES, COLORIMETERS & SAMPLE COLLECTION – THE TRIPLE PLAY WORKSHOP

DATES & LOCATIONS:

9/6/16 - Thousand Oaks

9/21/16 - San Diego

TIME: 8:00 am - 4:00 pm

PRICING: \$185 for AWWA Members / \$285 for Non Members

Workshop Description:

Module 1 – An Introduction to Chloramines

This class discusses the value of water disinfection, and the various methods which have been used to achieve a safe, potable water supply. Students are introduced to the Disinfection/Disinfectants By-Products Rule, and its impact on the water industry regarding water disinfectant choices. Students are provided an in-depth look at chloramine chemistry and the chloramine curve, with a step-by-step explanation of the reactions that occur in an ammoniated water as chlorine is added, through to breakpoint and beyond. Students are also introduced to issues associated with chloramine application, including impact on aquatic life, dialysis considerations, and nitrification signs and possible responses.

Module 2 – Water Sampling

This class is intended to provide the student with an understanding of sampling as related to State and Federal regulations and consumer protection; provide a demonstration of various types of sample collection; provide guidance regarding the preparation for sampling, as well as legal considerations associated with sampling Chain of Custody; and provide definitions of terms particular to the sampling activity.

This course includes a practical where students collect samples in a controlled environment, allowing them to refine sampling skills under supervision.

Module 3 – Use and Care of the Hach PCII

This course introduces students to use of the Hach PCII, and can be especially useful for students who have not previously used the device, or who use it infrequently. It is also an excellent refresher course for the experienced Hach PCII user, providing a lecture and practical that encompasses the details of both low-range and high-range application, and how to interpret colorimeter reads in a chloraminated system.

Additionally, students are provided instruction regarding the care of their colorimeter, including a review of colorimeter cell and device maintenance, and a discussion regarding various physical and chemical interferences.

**This workshop is eligible for
up to 7 contact hours.**
